## California 911 System

CA 911 Outages		
Northern California	Central California	Southern California
No 911 Outages	No 911 Outages	No 911 Outages

### 911 Outages/Remote/Community Isolations:

#### Tuolumne, Tuolumne County (New/Final)

On 05/10/18 at 1101 hours, CA 911 Branch reported a Community Isolation in Tuolumne, Tuolumne County.

- Approximately 772 numbers were affected.
- The Tuolumne County Public Safety Answering Point (PSAP) was notified.
- The isolation was due to a Digital Multiplex System (DMS) 10 remote switch.
- Splicers repaired the cable.
- Service was restored on 05/10/18 at 1057 hours.

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- Fuels are very dry and fire danger is high. These conditions combined with low relative humidity and strong winds will lead to widespread hazardous fire weather conditions for much of the state.

## **Weather Advisories, Watches, and Warnings currently active in California:**

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

\*\*\*Elevated fire potential at low elevations due to moderately strong, gusty northerly winds/low relative humidity (RH) through Saturday\*\*\*  
Northern California under northerly flow between a low moving into the Great Basin and high pressure strengthening out over the Pacific. Moderately strong and gusty N-NE winds from the western Cascade-Sierra slopes to the coast, peak gusts of 35-45 mph in wind-prone areas today, a bit lighter Saturday. Minimum RH will be 10-20% Friday-Sunday. Elevated fire potential in the dry windy areas today and Saturday at lower elevations with fine fuels. Scattered showers and isolated thunderstorms possible from the Cascade-Sierra crest east daily through Monday. Remote chance of stray showers or thunderstorms in the northern and western mountains. Afternoon highs generally a few degrees above normal next 7 days

## **SOUTHERN CALIFORNIA**

\*\*\*Strong winds across portions of the deserts today\*\*\*

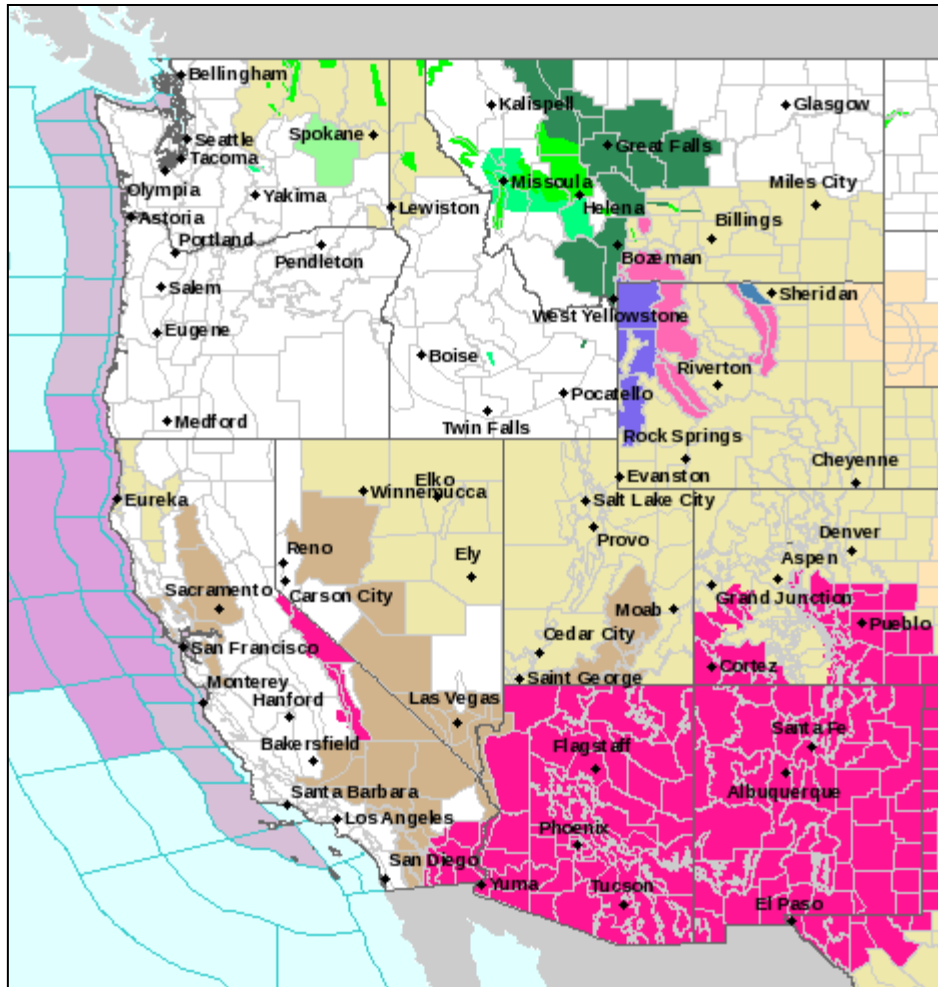

A low pressure area moving into Washington State will generate strong onshore flow, resulting in windy weather in and near the desert today. The winds are expected to be strongest across the Kern County Mountains eastward into the Antelope Valley and Central Mojave Desert as well as the southern 2/3 of the Owens Valley where west and southwest winds of 20-30 mph with gusts approaching 50 mph will be possible. The Colorado River Valley will also see similar wind speeds from the south this afternoon. Local downsloping effects may cause minimum RH to drop into the 8-12% range in these areas this afternoon. All winds should drop off this evening and remain light over the weekend. Elsewhere, expect archetypical "May Gray" weather with widespread stratus along the coast, valleys and even lower coastal slopes during the night and morning hours the next few days. Saturday looks to be the coolest, cloudiest day and some patchy drizzle or very light rain will be possible near the higher terrain. As the low pressure area moves inland, isolated wet thunderstorms will be possible right along the Sierra Crest Saturday through Monday afternoon. Temperatures will remain 5-10 degrees below normal through Monday. Some modest warming may develop next Tuesday, but another low pressure area may lead to another cooling trend late next week. No offshore winds are expected through the period.

# Cal OES LAW ENFORCEMENT MISSIONS

## Cal OES Law Missions

- **2018-LAW-46688, 05/11/18, 0657 hours:** The Air Force Rescue Coordination Center (AFRCC) advised of a possible ALNOT involving a Beechcraft Model 76, Tail# N803FC, with two souls on board that were scheduled to fly on 05/10/18, from Santee to Victorville and return to Gillespie Field in San Diego County. AFRCC advised ramp checks had been conducted with negative results. At 0723 hours the Cal OES Law Enforcement Duty Officer (LDO) requested Civil Air Patrol (CAP) be activated and AFRCC opened mission #18M0289A. At 0756 hours, LDO spoke to San Diego County Sheriff's Department (SDSD), who confirmed they were assisting CAL FIRE with a fire that was believed to be from a small plane crash that occurred last night in the area of Vulcan Mountain. Based on the last known position of the ALNOT, it is suspected this may be the same plane which crashed last night. SDSD is on scene but cannot make access to the site for identification until the fire is stopped. LDO updated AFRCC. **Mission Ongoing.**
- **2018-LAW-46678, 05/10/18, 1250 hours:** The International Emergency Response Coordination Center (IERCC) advised of an inReach "SOS" activation on the Pacific Crest Trail (PCT) approximately eight miles north of the U.S/Mexico border in San Diego County. Several attempts to communicate with the registered owner (R/O) via text and cell phone were met with negative results. The R/O's emergency contact advised he had started his PCT trek on 05/08/18 with a goal of reaching the U.S/Canada border by early Fall 2018. The R/O was reported to have appropriate equipment and no known medical conditions. At 1307 hours, LDO relayed the activation information to the San Diego County Sheriff's Department (SDSD) Dispatch, which deployed both air support and ground units. **Update: 05/10/18, 1539 hours,** SDSD advising the R/O was located and transported via ground ambulance to Grossmont Hospital for dehydration. IERCC updated. **Mission Closed.**

# Cal OES MISSION TASKING

## Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
